History AutoCAD was originally developed by Micrografx for its PC-based graphic design software Grafix Designer (later AutoCAD for Windows and AutoCAD for Macintosh) and later ported to MS-DOS. In 1995, Micrografx sold it to Corel Corporation, a privately owned software company based in Calgary, Alberta, Canada. On August 1, 2001, Corel Corp. was purchased by a management buyout company that was led by two former employees of IKON Office Solutions, Inc. On March 18, 2003, Corel was purchased by a company called IKON Office Solutions, Inc. for $1.5 billion. In 2004, Corel acquired Dassault Systemes, the owners of the AutoCAD software, for $1.2 billion. In 2007, Dassault Systemes was purchased by Micros Systems. In 2012, Dassault Systemes was acquired by Micros and EADS. Since 2012, Dassault Systemes and EADS are now part of the Axa Group. On September 6, 2007, Corel announced that it would stop supporting the AutoCAD for Windows and AutoCAD for Macintosh applications, and instead only support AutoCAD for the Windows and AutoCAD for Mac platforms for new releases. AutoCAD was originally available only in English. It was released in Brazil in 2005 as AutoCAD LT (later known as AutoCAD 2010). In 2012, Dassault Systemes and EADS announced that it would discontinue the AutoCAD product line, but continue to support the product, including releasing AutoCAD for Linux and AutoCAD for Windows (with Linux support discontinued in 2012). In 2014, AutoCAD for Windows was discontinued and a group of developers started to port the product to the cross-platform Win32 API and the a1d647c40b

If you have a question, please comment below.If you are a drag performer then you know that you need to wear a bra. That's because the shape of your body — boobs, bottom, hips, and even the curve of your inner thighs — is important to your success in the pageant circuit. If you're not wearing the right kind of bra, you can't please judges in the way they want. This is a pretty obvious point, I know. But it's a point that people frequently overlook. When people start out competing, they will often think that the bigger their tits are, the better. But in reality, this is not the case. Because the shape of your chest and nipples has a dramatic effect on your ability to carry yourself and your outfit during competition, it's a mistake to think that bigger tits are better. In fact, they're usually a hindrance. Why do you think your nipples are so much larger than your friends'? It's because you have a smaller chest size on average. Your boobs are getting larger as you get older, but the average woman's chest size actually gets smaller with age. It's the same way for bottoms. If you have a wider and flatter butt, you're going to have a better runway. But that's not to say that smaller butts are the "holy grail." If you have a larger butt, it's usually a good thing. So why do people get "butterfly" bras instead of "pushup" bras? Well, they're just easier. In a pushup bra, the front of the bra
