The 27-year-old's return to work has been a whirlwind and he couldn't help but smile after opening a bottle of champagne at the team's training centre in Berkshire. Schoeman had been absent from training and the gym since he was suspended for a disciplinary offence at the start of November. The left-back was sent home and given his marching orders after turning up late for a team meeting on the morning of the league fixture against Leicester City, which means he will miss the next three games. Speaking to the media on Friday, he said: "It's great to be back in the first team. I don't know why I am in the team, it's nice to be back, get my timing back and get back on the pitch. "I'm just taking it as it comes, I'm a bit of a 'lucky guy' in that respect, I'm one of the first people they usually call into the team so I get to be part of this whole experience, I don't want to look back and say 'I could have been in the team'." Schoeman has been an influential figure in the dressing room since joining from Ajax in 2015. But he added: "We're close enough to each other that we can talk things through so we're all in this together, there's no need for any egos to start growing. I heard this phrase often used in the media, particularly in advertisement and social media. Sometimes the context is very obvious, such

## What's New in the AutoCAD?

More than 250 new commands and enhancements in the drawing area. In the drawing area of AutoCAD, more than 250 new commands are available. New commands help automate tasks that are common in all CAD drawing programs, such as deleting multiple objects, converting objects to a different family of objects, and more. Printing, PDF and e-mailing: The AutoCAD® Print Task Pane lets you select commands for printing that are relevant to your design, while still showing you more. Automatically color correct and reduce to the correct paper size. Color standards from different countries and regions in a single project are automatically formatted into a profile and color-corrected before printing. Save time when exporting PDF or e-mailing files, with new commands and enhancements. Drawing, Layout, and Documentation: Adjusting the insertion point. You can now choose to move the insertion point one, two, or three steps at a time. (video: 1:12 min.) Create multiple views. You can now switch to a different view within the same drawing or have the same view active in multiple drawings. (video: 1:11 min.) Labeling with the text annotation feature. Use the text annotation tool to label objects or places in your drawings. You can label individual edges or use an entire edge path as a label. You can also add comments to your drawings. Calculate labels based on geometric boundaries. Create your labels automatically based on your drawing's dimension or graphical annotation objects, such as the height of a fence or the depth of a road. Measure distances in a set of points on a complex outline. Draw lines that aren't actually perpendicular to the plane of the paper. Create a title block in seconds. Automatic view navigation. When you are working with an architectural model or design, you can continue to use the direct navigation shortcuts to quickly navigate from one view to another. Virtual keyboard shortcuts. Autodesk added two new keyboard shortcuts in AutoCAD LT: Ctrl + F6 to create a new wall plane, and Ctrl + F9 to create a door frame. Improvements in the industry standard CAD operating environment. For example, in the Windows version, you can now press Ctrl + F11 to expand or collapse the tool bar at the bottom of the screen. In AutoCAD LT, you can also use Ctrl
