They (and many other companies) pay thousands of dollars for licenses for this program. In order to 'borrow' some of that money, you can download the trial from autodesk and then use the auto-authentication to activate it. You can download the trial from Autodesk's website Once the product is activated, you will be prompted to pay for the license. If you do not want to pay for the full

---

license, then consider the Free Trial. A: Just another quick note: I downloaded the Trial Version of Autodesk AutoCAD by clicking this link (you need to make sure you have Autodesk Subscription activated in your account): Once you download the application, right-click it and select Properties. In the Properties window, click on the Unblock button. Now you will have access to the program and you can use it without activating the full version of the program.
