To achieve the best signal-to-noise ratio, set your analog source to its maximum output level and then reduce the input gain in TotalMix or Babyface. Â! Connect a digital audio card to the mixer's input to enable zero latency monitoring.

This allows you to control the sound without distortion. Audinate and Digidesign digital cards may have zero latency monitoring capability. On an Aguila card, you may have to reduce the input to enable zero latency monitoring. Â! If you use digital effects, you usually have to use analog monitoring when recording in real time.
