----- If you want to contact me: Email: [email protected] Twitter: Facebook: Hi, this video shows you how to make a 20x20 LED cube by using 4 neon tubes. The LED cube is created using an Arduino and a Raspberry Pi 2. To make the cube, you need to solder the neon tubes on the Arduino and the Raspberry Pi. If you want to make the LED cube a few things should be noted: 1. Neon tube is 20cm long. 2. You need to use a soldering iron with a 0.1mm tip. 3. The neon tube must be fixed to the Arduino and Raspberry Pi, as shown in the video. 4. If you start the cube while the Arduino is still booting, the cube may not work properly. The neon tube may not operate. To prevent this, turn off the Arduino and Raspberry Pi before starting the cube. 5. The resistor for the neon tube needs to be changed according to the tubes you use. The red and blue LEDs must be in parallel. 6. You should place a piece of non-conductive material between the battery and neon tube. 7. When connecting to the Raspberry Pi, you need to consider the logic of the board (input/output). The Raspberry Pi 3 and Raspberry Pi 4 have different logic. 8. When the Raspberry Pi is turned on, the cube can not be activated. In this case, you
