Check your power bills, or wish to send a quick link to a friend on your phone, why not save the URL and reuse it in the future? This is exactly what Simple URL: Easy URL Shortener is

designed to do. With Simple URL:
Easy URL Shortener you will not
have to worry about your URL
being forgotten. Version 1.0.5
Added: Easy URL Shortener now
has a help menu! Version 1.0.4
Added: Here are some tutorials on
how to use Simple URL: Easy URL
Shortener, firstly on how to set up a
new link, then how to set an Ident to
your link. Version 1.0.3 Fixed: The
Title of the help window was
missing in version 1.0.3. Version
1.0.2 Added: The menu has now
been updated to a more modern

style! Version 1.0.1 Fixed: The help window did not work for the first time used. Version 1.0.0 The project has been rewritten from a Windows Forms project to a WPF Application. This allowed us to make it a Universal Windows Platform application. An example application has been provided for WPF, which can simply be copied to your application directory and run. Simple URL: Easy URL Shortener also integrates into any website and does not need any plugins. It will enable you to see the short URL of any of the website's links and allows you to share it anywhere you wish using a button or HTML. You can configure everything from your very first visit to your first usage of the service. more infodownload
Simple URL - Online Service that turns ugly URL address into beautiful and easy to share links. If

you visit a long address on a site that has built in button, like news site or social network you will be annoyed by long addresses and uncomfortable work to share them, no need to waste your time with that! Now you can use any link on a site and they will be given a short url you can copy and paste anywhere that has a button that allows you to share on Twitter, Facebook or Google+ for example! And even better, if you visit a site that has no built in button the online service will create the button with

that site's logo and name and it is very easy to configure. You can configure everything from your first visit to your first usage of the service. Now, whenever you visit a page, regardless of where, the service will save the page's URL, extract it's links and create short URLs for you! With the button you can share the short URL on social networks, send email to friends, or even open the URL in a new window where it can be copied and pasted! Here are a few examples of the services, add your site (or any!)

here: Facebook: Simple URL - Online Service that turns ugly URL address into beautiful and easy to share links. easy button here and by simply
clickin...OpenRA - first with Open
Source Posted on - Saturday 13th of
June 2016 at 00:00 With OpenRA -
first with Open Source OpenRA is a
traditional mod you know and love
based on the very popular game
series of the same name by Chris
Roberts. It has been an amazing and
rewarding experience for us to have
been able to present it to the players
as an open source mod. You may
have heard the news. We have
created a new project and we would
like to tell you more about it.

Building a new mod is fun and rewarding. There are many interesting aspects that you need to think about and we will go into some of them in the following slides. What is an open source mod? OpenRA is a mod. OpenRA is a mod - meaning that it is an enhanced version of the original game - that we are able to share with you. This means that it is a community run mod. With an open source mod you can have access to the source code and of course you can download, install, play, use the

mod and even change the source code yourself if you wish. You can even contribute to the mod! Having open source mods is an awesome thing. It allows you to learn a lot about modding. You can create your own mods, you can base your mods on existing mods, and you can contribute to existing mods. You also learn a lot about the modding of games in general. Being able to see how the original mod designers of the game think and do things is extremely rewarding. With an open source mod you are able to see what

others have done before and why it was done the way it was. This might also be quite interesting for your own mod. If you look at some existing mods, you can often find things that you want to do differently than the original design. If you see a mod you like, you can always download the source code and use that as a starting point for your own mod.

System Requirements:

Supported Microsoft Operating Systems: Windows 7 Windows 8 Windows 10 Mac OSX 10.7 or later

Minimum System Requirements:

Recommend System Requirements:

System Requirements: CPU : 64-bit Intel Core 2 Duo or later : 64-bit Intel Core 2 Duo or later RAM : 2 GB of RAM : 2 GB of RAM Hard Disk : 5 GB of available space for installation : 5 GB of available space for installation Graphics Card : Nvidia GeForce GTX 460 or

AMD Radeon HD 5770
