Smart Timer Crack + (LifeTime) Activation Code Free Download

Smart Timer is a small Windows application designed specifically for helping you execute a user-defined tool or restart or shut down the computer at a custom time. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to schedule different actions on the breeze, without having to go through installation steps. Minimalistic looks You are welcomed by a clean feature lineup that allows you to carry out most operations with minimal effort. There's not much to brag about the user interface, as everything is kept as simple and clear as possible. Main features Smart Timer gives you the possibility to schedule a new task by selecting the program that you want to run or activating one of the following options: shut down, restart, hibernate, or suspend your computer, or log off the current user. What's more, you are allowed to manually pick the date and hour with the aid of a built-in calendar or make use of the countdown timer. The lack of configurable settings makes it an ideal program especially for less experienced users, who don't want to spend too much time tweaking the dedicated parameters. However, it would have been useful to see support for custom audio notifications to be played before a task is triggered. Performance Tests revealed that Smart Timer carries out a task quickly and without errors. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. Bottom line All in all, Smart Timer proves to be a handy piece of software worth having when you need to schedule different actions, such as run a custom application or shut down or restart the computer at a certain time. You can schedule a Shutdown, Log Off, Restart or Hibernate at an interval as well as take advantage of the countdown timer or the calendar to plan. It is fast, simple to use and easy to understand. It's light-weight and easy to use. Controls and View your date/time - it remembers what you schedule. Shut down, Restart, Log Off from a specified time. Timers allows you to schedule a new task by selecting the program that you want to run or activate one of the following options: shut down, restart, hibernate, or suspend your computer, or log off the current user. Easy to program, easy to install, built-in countdown timer. Windows Vista and 7 Compatible. Custom notifications for shutdown, restart, log off. Description The main objective is to tell you how to run a program at a specified time. For example, if you want to run a program at your desktop or logoff at 5:30 PM, you have to decide on a few issues. First, how often do you want to perform this task? For example, you might want to schedule the run a program task every week, but that might be a bit of a chore, and second, at what time do you want to perform this task. For example, if your are planning to do this task and shut down the computer at 5:30 pm, you need to set a date, time and day of month. The program is simple to use, no longer have to go through the configuration of the time and date that you can implement the schedule, nor do you have to log on and log off the computer. You can use the program to do everything you need. Requirements This program works on Windows XP, Vista, and 7. The program uses both the application menu and the Windows key to control the desktop. How to Use: - Click on the Start menu on the right of the screen. - Then select All Programs - There you can find a program named Timers - Click on Timers to access the Start menu - Select the Start menu and click on the Timers - Click on Start Option - On the Timer, it will display the options of how to use it
