Lesson 9. The creation of objects. Rendering. Today we will learn how to create simple objects: human body objects, objects. On the example of several models we will see how you can create realistic bodies, and how they can be edited. We will also learn how to create lighting scenes, create animated models with camera effects. This is a great lesson for those who are just starting to learn 3D Studio Max. 3D MAX Effects. Lesson 1. (Video) In 3D MAX in the 3D Effects tab you can create and edit various effects for our 3D scenes. Effects come in dynamic, static and fractal. Dynamic effects such as smoke, fog, snow, fire, water, etc. are created using the 3D VFX editor. In 3D MAX program it is possible to create and edit such effects. To do this, click on the Effects button, then sub-item Batch (Package), in it selects Fractal. After that, you can edit the fractal: change the size and direction in which to move the polyline. You can get different shapes, you can create fractal shapes, and you can create effects based on them. If you don't want to look through the whole site, you can browse and download the whole archive (there are sources in the archive that you can use to create effects). You can read about fractals here:
