1998Q: How to get one or more

UINavigationController's on screen in Swift 3

I'm using Swift 3 and need to get a reference to a UINavigationController's topmost UINavigationControllerItem and then get one or more UINavigationControllerItems that are on the screen to compare one of them with the topmost. I've tried to figure out how to get the topmost UINavigationControllerItem with `self.navigationController?.topViewController?.navigationItem.top` and the topmost UINavigationController with `self.navigationController?.topViewControll`

---

er and as I understand it, they both should be equal to each other, but I'm not sure how to use them to achieve the goal. How can I get one or more UINavigationController's on the screen and compare one of them with the topmost UINavigationController? A: `self.navigationController?.topViewController` is the navigation controller, not the navigation controller's top view controller. You can use `let topVC = self.navigationController?.topViewController` if you want the view controller itself, not the navigation controller's top view controller. Then you can get all the view controllers in the navigation controller using `let vcs = self.navigationController?.viewControllers` or

---

```
let vcs = self.navigationController?.visibleViewController and compare the one you want with the topmost navigation item using a switch, for example: let vc = topVC?.navigationItem.title switch vc { case.Something: // do something
```

What's New In EFront LMS?

eFront Learning Management System is a SCORM-compliant LMS that can be used to create, track, and manage courses, trainings, and professional development of any kind. It is an easy-to-use, visually attractive, Ajax-powered, web-based application with an intuitive interface. With eFront, you can meet the challenges of today's global workforce

---

and comply with the demands of tomorrow's compliance with a single solution. It is a very comprehensive platform, allowing you to integrate social learning, e-learning, contact management, analytics, and more. It offers the core components of any LMS: access to a catalog, training records, email notifications, training history, a communication and collaboration portal, exams, quizzes, certifications, training records and a lot more. It also offers a variety of features and tools that make your LMS more powerful and complete. eFront web-based LMS has a robust set of features. Here's a quick list of what it includes: An LMS for the B2B & B2C

---

market The eFront LMS is a B2B & B2C, Ajax-based web application. This means that it is accessible from a laptop, tablet, or smartphone and can be accessed from anywhere. It also works for both B2C and B2B environments. That means that it can be used by both corporations (B2B) and individual customers (B2C). A course catalog with different types of courses The eFront LMS has a catalog with different types of courses. These courses can be divided into different themes, topics, categories, etc. Module management & version control Modules are the main elements of the course/training and have different features (as described in the Module

---

section). With eFront, you can create, publish, and administer modules. You can also create, edit, and delete modules and their modules. This allows you to control the whole course in one place.

**Configuration** You can easily and quickly configure your eFront course. The purpose of eFront is to provide a user-friendly interface, but you can also configure your eFront LMS to your liking.

**In-App messaging** A message board can be used to post messages for everyone to see, or specific messages can be sent to specific people or groups.

**Training calendar** The training calendar shows you the activities you have scheduled. You can schedule meetings

---

and other training activities with the calendar. Customizations The customization options in eFront are extensive. These options are divided into different features in a typical LMS:

Layout The layout can be changed in eFront according to your requirements. You can choose from different layout themes to get a different look and feel for the eFront LMS.

---

**System Requirements For EFront LMS:**

Windows: 7, 8.1 or 10 (32/64-bit) Mac: macOS 10.5 (or later) Input: Windows and Mac keyboard or controller Sound: System audio (stereo or 5.1 surround sound) Controller: Xbox 360 gamepad Game: Ratchet & Clank (PS3/PS4/PC) USB cord: Universal Xbox 360 controller adapter, Xbox gamepad or Microsoft Wireless Mouse with universal receiver Additional notes: Shake to
