By Elisa Heffner (This story was updated at 4:30 p.m.) LITTLE ROCK, Ark. (AP) — Residents must be vigilant about pesticides in a town where there are no pesticides and a lightning strike killed 11 people two years ago. The Heber Springs Fire Department said as of this morning, investigators have not determined the cause of a fire that started in a structure on Hilltop Drive and claimed five homes in the South Arkansas City subdivision on Sunday. A resident saw smoke coming from the structure around 8:30 a.m. and called authorities, the department said. Deputy Fire Marshal Jerry Duckett said a preliminary report shows the blaze “was caused by some sort of electrical issue.” A house on Hilltop Drive in the subdivision was destroyed, and two other homes suffered fire damage, Duck

**by Dormin This game is definitely a must for MGO fans. I was very excited when I heard that Aeria Games would release a MGO game. I had some hope for this game since I really like the game but it was not what I wanted. Let me go back to basics to explain. I am a huge fan of MGO, I played the game as much as I could, had all the DLCs and I have all the items. I loved the game and the characters are so cute and adorable that it made me fall in love with the game. I am not in anyway upset about it but as I had hoped. Now I am a big fan of MGO. I have played all the main characters in MGO and I have not seen one that I am not in love with. The main characters are just so funny, I laugh at almost everything they say. This brings me to what I wanted the game to be but it was not it. Aeria Games did not give this game as much attention as I would have liked. This game plays like any other MGO action RPG, you have to do quests and fight bosses and so on. The main menu does not have as many options as other games. For example, my PC has a 4K monitor so I can go in the options and change the resolution to one of the other game qualities**

---

but it did not have it. The main menu did not have a quest list like other games. There was no quest list where you can chose what you want to do. The quests were not the same as the quests you do in the other MGO games. For example, you could choose to do the normal quest or the side quest. The side quests were not always fun and usually were not fun because you could not really do anything with them. To complete quests, you go to them which is good. You go to them so that you do not have to return to towns and do side quests and do other things which is good. The problem is that you go to the quest with a time limit. If you wait for too long to finish a quest you have to wait for a long time to do it again. The great thing about MGO is that as you clear the game, you unlock new characters. In this game you could not do that. I wanted to unlock the game or characters but I could not do it. I could only do the same quest bff6bb2d33

**number of strategies have been evaluated in clinical trials. In this study, several insulin-like growth factor (IGF) analogues were bound to one of four folate derivatives via an oxime linker to obtain conjugates suitable for the storage as once-a-month injections. Chemical and formulation studies were performed to investigate the interactions between the oxime linker and the different folate derivatives. A vial containing only the protein component of the conjugate was dissolved and mixed with folate either in aqueous solutions or as oil-in-water emulsions. The stability of the IGF-conjugates was assessed at 6°C for 28 days. The compound could be stored in the home for up to 21 days (per dose) when stored in aqueous solutions at 2°C. In oil-in-water emulsions, the stability of the conjugates was determined through the assessment of the resolubilization rate and the breakdown products of the complex. The results suggest that the storage of IGF-receptor family ligands in this way constitutes a promising approach to circumvent the problem of immunogenicity.**
