The development staff will be overseeing the quality of the game and communication with the fan base, and will take all steps to ensure that the game's quality will remain high. TL;DR: Get it, play it, and join the Harnessing Chaos hype train! If you have any inquiries regarding the game, please contact any of the staff of the Harnessing Chaos TEAM at [contact@harnessingchaos.com](mailto:contact@harnessingchaos.com), or directly on Discord. About Harnessing Chaos Harnessing Chaos is a fantasy action RPG developed by the people who brought you the acclaimed/well, somewhat still in development, at the time of writing this Harnessing Chaos game. The Harnessing Chaos team is currently working hard to bring you an online fantasy game based on the Lands Between, as seen in the "Lord of the Rings" by J.R.R Tolkien. The game will feature an online multiplayer aspect that allows you to explore a vast world together with your friends and other players from around the world, while you can also play the game on your own and experience the Vast World. Story The year of 2171 A.D. has begun. The elves have begun to travel to the western regions of the Lands Between, where mysterious things are coming to life. Ruins that the elves once thought were just a part of the Lands Between were in fact items that belonged to a long-forgotten civilization. In these ruins, the twisted elves have found wild beasts that used to live in groups and remain there. They are in uproar and screaming out in fear and anger. What is this? The Land Between had been contaminated by the existence of a civilization completely out of this world? As such, the wild elves were at an impasse. They couldn't live like that. And in such a case, they would become food and be exterminated by the twisted elves. In addition to that, they had no clue as to why the twisted elves had begun to appear. Upon hearing of this, the king of the twisted elves was at a loss for words. He immediately went to consult with his elite warrior class and asked them for their opinion. "Can you really stop these beasts?" "I'm pretty sure the wild beasts would attack us if they see us coming." "Because we've been contaminated, we can't clean this up." This was of

It's possible to quantify Bitcoin's attractiveness to criminals. Most cryptocurrencies are based on algorithms that keep "miners" (computers that solve difficult mathematical problems) in exchange for the digital tokens. There are roughly 7.4 million miners, all of whom are pursuing different strategies to benefit from a burgeoning and controversial market. A sizable contingent of those miners, however, are exploiting the technology to carry out a variety of crimes, including money laundering and ransomware attacks. A report released today by a security firm estimates that since 2013, 90,000 of the miners operating online could have been connected to illegal activity. This finding has somewhat surprising implications for Bitcoin. While the cryptocurrency has largely retained its reputation as a high-profile tool for criminals, the fact that only a small proportion of miners are engaged in criminal activity suggests that there is something about the approach taken by the currency that makes it less enticing to criminals than more traditional banks and payment networks. If that's true, Bitcoin could be in trouble if it doesn't soon begin to appeal more to law-abiding consumers. Bitcoin is a virtual currency. It's created

through a process known as "mining." Miners use specialized hardware, sometimes called "ASICs" (Application Specific Integrated Circuits), to solve mathematical problems that keep the Bitcoin network stable, among other things. The math problems are also used to generate Bitcoins as a reward for doing so, while the network's own difficulty bff6bb2d33

Q: Reading files with spaces in PySide I'm trying to read a text file with PySide, but I can't get it to work. With Python 3.4, this is a working example: `f = open('sw.txt', 'r') print(f.read())` With PySide, I get this error: `AttributeError: 'NoneType' object has no attribute 'read'` So I have two questions: How can I read text files in PySide How can I escape spaces in a text file in PySide

Sw.txt: This is an test sentence

A: As pointed out in this answer, the constructor for `QtGui.QFileInfo` should be used: `import sys from PySide.QtCore import QFileInfo with open(sys.argv[1], 'r') as f: data = f.read() print(data) # print of original file # 'This is an test sentence'` Depending on your needs, you can also change the data variable to have the entire text instead of just the data from the file.
