Slave RPG is a dystopian role playing game that takes the core gameplay found in CRPGs and brings it to an 8 bit inspired world. NPCs that resemble Disney characters from the 80's have been added for some added fun, and a few secret features are also included in this game. The overall game is a straight forward RPG, but the inclusion of a dynamic dice rolling system and a character progression system allow it to stand out from the crowd and add some other depth for the players to explore. Some things that are included in the game: 4 main races to choose from 40+ default classes 8 core stats,

along with custom stat creation In-depth role-playing options In-depth character progression options A dynamic dice rolling system A dynamic levelling system Hackable AI A strong story-line A wide range of difficulty settings 4 different endings to the game A massive post-game A variety of secret features to unlock Custom Class creation is possible Passive Perks Active Perks And More! Fixed the blood on the floors slider. Fixed the slider for dismembering the bodies of corpses. Fixed the quickslot list to include male and female outfits. Fixed the sliders for character deaths and crew members. Added 10 new clothes for male and female characters. Added a title screen. Fixed the issue when the hole option wasn't on for the player. Added a new set of options for the sliders. Added a title screen. Fixed an issue when there wasn't a floor tag in some of the rooms. □About Game□ Wonderland is as we see it. A peaceful place where growth and development of people takes place. A place that can still be as eerie and different as the legendary town of Wonderland. A place where every single star has its own tradition. A place where each person creates a dream of the future based on their own experience and past. And so, far away from this peaceful land, lives the army of aliens, the “Kilopension”. A strong military force that has managed to dominate almost all of the galaxy. As they continue to expand their influence, the fear of Armageddon is spreading throughout the galaxy, and mankind faces a desperate struggle in order to survive. If we are to escape the impending collapse of the Milky Way, the only hope will be to organize a resistance army against the Kilopension. That is why our race have decided to build a legendary tower-defense game.

□Gameplay□ When the game starts, you’ll be in control of a small team of heroes. You’ll be building towers to block the doors of an alien invasion and you’ll be able to build a strong defense using its on-site facilities. As the invaders approach your fortress, they will need to destroy certain parts of your base or just ignore it. You’ll need to constantly monitor the situation and strategically build and upgrade your defenses using your limited resources in order to win the game. You can use your miners to discover and extract resources in order to upgrade your weapons and other facilities. As you defend your base, you’ll encounter different types of hostile alien threats. Different types of mines, weapons, and power injectors will offer multiple tactical strategies and require a different strategy. □Product Overview□

If your first time playing this game, you'll notice the game is very similar to Oblivion, which means this is a very big and long game. In this case, you control a kid, but you have to look like a kid. If you see a time limit you will not win the game. The graphics are excellent, like Oblivion but much better, and the game runs with great difficulty. It is also much better than the Oblivion game, because this one takes you to a much darker, evil world. The game starts with a choice of five different characters: the blonde, blue-haired Mibibli (you), the small, chubby, and fierce vampire, Dewald (Dewald), the small and cute forest spirit, Zibranna (Zibranna), the bull-like, yellow slobbah, and the green-hided wizard. When you start out you'll play one of these characters and travel around the forest to find Mibibli's lost treasures, but the game is never ending, you'll have to play one of the other three characters in the game, and it is a hard choice. The quest line for each character is different, and the game has seven to eight different areas, many cities, and hidden and secret things to find. The combat system is great. You have a sword, a hammer, and a crossbow. You also have different types of potions and armor. The combat in Mibibli's Quest is very easy to understand, but hard to master. You have three types of attacks (Able, Easy, Hard), each is equivalent to an arrow on the keyboard. If you hit, you deal damage, and you can use two type of attacks at the same time (Able+Able, Able+Easy, Easy+Easy, and Easy+Hard). There are also different types of enemies: a good guy, an evil guy, a normal guy, a big guy, a wizard, a witch, a zombie, a zombie with a crossbow, and a witch with a crossbow. The good guys won't attack you if you are friendly. If you are not friendly you can deal damage to the enemy. You also can get bonuses by casting certain spells and wearing certain potions. All in all, combat is pretty easy and fun. There are also lots of challenges, like you have to search for 20 hidden moles, you have to kill 30 enemies, you have to find 5 items, or you have to kill
