FIFA 21 introduced a new ball physics technology, dubbed “Fury,” that more accurately models the unpredictable behavior of a real football. It introduced the Kick Speed Matrix (KSM) - a new control scheme designed to optimize control and predictability on any surface, making it easier to play the game at speed. The KSM takes into account pitch size, surface condition and the dynamic nature of a football, such as air pressure, aerodynamics, friction, wear and tear, as well as the natural characteristics of the ball itself. In more ways than one, FIFA 22 is a testament to the continuing advancements in gameplay technologies. Due to the fact that game development technologies continue to advance, gameplay evolves and the latest FIFA is sure to deliver the best of the best on Xbox One X when it launches on December 1.

FIFA 22 is fully optimized for PS4 Pro and Xbox One X On all platforms, FIFA 22 delivers significantly improved graphics and new animations that have been optimized for the latest consoles and make each player, ball and stadium look and feel more realistic. New crowd animations also give players a more authentic, in-stadium experience. Player models and animations have been reworked, while a new Face Posture technology significantly adds to player personality. Dynamic 3D player models are now deployed at speed, and FIFA 23 will be the first with full variable player hair. A new “Beauty Shot” goal celebration feature creates opportunities for all kinds of celebration moves for your favorite players, and the Brand Index and Team of the Year systems have been reworked to make things like “World Player of the Year” more meaningful for fans. On Xbox One X, FIFA 22 is also a crisp 1080p60 Xbox One X Enhanced title. With more power to use, the team has placed an emphasis on smoothing the player movement experience of the game, as well as the ball physics and effects. This, along with using the extra power to push the geometry, lighting, effects and textures in FIFA 22 to the edge of reality, will allow players to accurately control the speed of the game
