For players, this has allowed us to vastly improve the feel of controls and gameplay, making them more accurate, responsive and rewarding to master. The engine under the hood has also been upgraded, allowing players to race for a full 90 minutes, and even track opponents from start to finish in the new Player Confidence features. In addition to the new Player Confidence, a new Skill Games makes for easy and fun training experiences, and a new Squad Battles feature pits two players against each other in a series of games to define a starting 11. See the official site for a full list of game features and enhancements. The 2014 FIFA World Cup Brazil opens on June 12, and there are new ways to watch the action. Available June 12 on iOS, Android, PS3, PS4, Xbox 360 and Xbox One: Most players associate social media with the world of sport. In fact, platforms like Instagram, Facebook and Twitter have transformed the way soccer fans engage and interact with the sport. "That's why as we prepare for the 2014 FIFA World Cup BrazilTM, we want to make it easy for our fans to show their support for their favorite teams, players, players and styles." Starting with our mobile apps, users can follow their favorite teams by tapping on the icon in the top corner of the screen. As they watch the games live or through highlights, they can always share their play-by-play opinions. In addition, fans can follow their favorite players on Instagram and Twitter, watch them on Facebook or follow them on the official 2014 FIFA World Cup Brazil app. When it comes to the next iteration of the Player Creator, we're striving to personalize the experience. For example, users will be able to customize the visual look and feel of their character. They can pick their preferred skin tone and have multiple options for what their hairstyle looks like, be it short or long, combed back or curly, spiked or brassy. But that's just the beginning. In future versions of the Game Center and in-app purchases, players will have the ability to invest in their favorite players. Users can pick their favorite team, player or player styles and earn virtual currency as they unlock and collect new items, special uniforms, jerseys and other items. They will then be able to use in-game currency or the virtual currency they've earned to get the best gear.
