IFR Aviation Manuals - Pionair â€” File size: 48 MBytes.The present invention relates to a pulse signal generator and a pulse signal generation method, and more particularly, to a pulse signal generator and a pulse signal generation method for generating a pulse signal with a predetermined pulse width according to input data. In order to drive a semiconductor switching device such as a power MOSFET, an IGBT (Insulated Gate Bipolar Transistor), or the like, it is necessary to generate a pulse signal with a predetermined pulse width according to a data signal having a predetermined level. Therefore, the pulse width of the pulse signal to be generated should be determined according to the data signal level.Who's Who in the Tea Party? A Tea Party Leaders' Guide
