.Q: Is there a way to "recover" a shrunk database We were in the process of upgrading our production database to 8 gigs and it was shrunk back down to 7 gigs. We noticed a day after the database was shrunk that we had a bunch of dead rows. We were able to reproduce the database shrink back to 7 gigs so we don't know for sure what killed these records. I'm hoping there is a way to recover them somehow or at least I would at least know the database has shrunk back to it's original size. I don't see any transaction logs because we don't do any transaction based operations on this database and this is an inactive system. A: If you have access to SQL Server Management Studio, you can see the sizes of all tables in the database in the Database view.

Main menu 2013 C4 Corvette Comments Submitted by Webergz on Sun, 12/17/2012 - 08:53

Been following this car for years and what a ride. The 2012 with the improvements and mods sure does look good. I really like the wheel arches. What a car and the price is on the good side. I just hope it was a 2013 model and not an early 2013 year model. The earlier year Corvettes were known for problems and have more downtime. Correct. We will soon have the final word on the 2012-2013 Vette models. The Chicago Rambler will have a winter test

---

in Michigan to be in time for the winter warm up there. Chevy is planning on having the rest of the world warmed up by the end of January and they will be ready for spring in Detroit. By then of course all of the other cars and trucks will have been out on the market long enough for the "early birds" to be testing them. There are a lot of "Masters of the Midwest
