The beautifully rural Mon Line running through the heart of Pennsylvania springs to life in this new route for Train Simulator, complete with mile-long coal trains and distinctive street running. The original Monongahela Railroad was a joint venture between the Pennsylvania Railroad (PRR) and the Pittsburgh and Lake Erie Railroad (P&LE). Through the early 1900s, the two companies acquired many lines in the area and by 1930, the Monongahela ('Mon Line') was operating more than 170 miles of track serving numerous coal mines. At the heart of Pennsylvania's coal country, the rural Mon Line is today owned by Norfolk Southern with CSX Transportation also having trackage rights. Coal mines dominate the route, with important facilities at Bailey Mine and Emerald Mine connecting with a staging yard at West Brownsville from where coal trains continue on their way to power stations or to ports for export. More than 20 million tons of coal is annually transported along the line, much of it to Loveridge Secondary where it is transhipped from rail to river barges. The route is primarily made up of four branch lines - Manor, Ten Mile Run, West Brownsville and Loveridge, and includes the unusual spectacle of full size coal trains sharing the public highway with cars along Main Street in West Brownsville. Included with the 50 mile section of the Mon Line from Bailey Mine to West Brownsville for Train Simulator is a Norfolk Southern-liveried ES44AC diesel locomotive, part of GE's Evolution Series. Its mammoth 4,400 horsepower and 75mph top speed make it an ideal locomotive to head the long coal trains seen on the Mon Line. Engineers can also create their own coal loads at Bailey Mine and Emerald Mine with working coal loading facilities, and experience the rail served businesses along the east bank of the Monongahela River, including a metal recycling yard north of Brownsville, river barge repair and construction yard to the south, and a rail/river coal transshipment facility at Alicia. Scenarios Seven scenarios for the route: Training: ES44AC Expert Controls Training: ES44AC Simple Controls Running the Manor Emerald Coal Run Power Supply Monumental (Part I and II) More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't

Train Simulator: Norfolk Southern Coal District Route Add-On Features Key:

Download the Add-On
Enjoy the landscape
It's a part of NS franchise

Controls

- Press the NS trackpad or Trackball button to switch trains

How to Install the Add-On

It's fast, easy and safe that the compatible window in the next page.

Download and Install NS Coal District Route

To download and get install the compatible Add-On. First, you need to check if you have the game Steam and Play NS FS In Transit following pc system.

Installation Instructions

-
- Step 1. Launch the Steam
 - Step 2. Click on Games, then click on Activate a Product on Steam
 - Step 3. Now click on Install games and select NS Coal District Route.
 - Step 4. Click Next.
 - Step 5. Install and then Play
 - Step 6. Go to your game menu and Open the game and Play.

Train Simulator: Norfolk Southern Coal District Route Add-On [32|64bit] (2022)

Become a real-life railroader and experience the Mon Line for yourself. The Mon Line of Pennsylvania is an area of rugged, rolling hills, beautiful countryside, and a great place to live. A scattering of coal, iron and oil mines brings in the income to support the small towns that dot the landscape. Scenic branch lines and main lines thread through the quaint little towns and villages, while lovers of the outdoors can find great hiking and mountain biking opportunities in the rolling hills. The Mon Line of Pennsylvania is also home to the Monongahela River and it rises in the Keystone State to be part of the Ohio River system. Download the Mon Line of Pennsylvania from Train Simulator DLC and experience the Mon Line for yourself. Product features: Steam Workshop and In-Game Editor: Train Manager and other railway specialists can expand the routes and add new scenarios, locomotives and freight wagons, in a matter of minutes.
