## Autumn NetSpy

Autumn NetSpy is an affordable, easy-to-use network detection and time-tracking application. It periodically checks your PC, the Internet, and any other network to see if someone has hacked into it or turned it on and off. If it finds a system on the Internet, it tracks the exact time and location of that system. With Autumn NetSpy, you can keep track of your incoming e-mail, download updates from the Internet, or even listen to music over the Internet. Autumn NetSpy Features: \* Network Detection: This nifty program checks your PC and the Internet for computers that are on, and when they are off, and notifies you to any changes. It can also keep a log of the computer's Internet activity. \* Spoofing: Access to DNS and SMTP servers can be allowed or denied to rogue computers from a host. \* Timing: A 30 second countdown timer will be displayed and notifies when the host(s) are turned on, off, or when they are booting, shutting down, or lost in the Internet. \* Malware Scan: Check for viruses with a free virus scan scan. \* Logs: A log of your internet activity can be printed. \* Interface: Detailed reports can be printed and emailed. \* DNS: A simple interface to allow network activity tracking. \* More advanced features will be added in the future. Requirements: \* Windows 2000/XP/Vista/7 (32/64-bit) \* Internet Explorer 4.0 and above AutumnNetSpy.zip (41.7 KB) Autumn.zip (251.3 KB) The application is part of the Trojan.Win32.SlszApp - threat, this malicious application is designed to download and install other malicious applications. The analysis of the application showed that it spreads by use of social engineering tactics. The main purpose of this application is to download other malicious applications and install them. It was detected by the security experts that the infected machine can also download and install keystroke logging software. It was detected that the threat uses the Win32/R.Trojan.Win32.Agent.c virus as its component. File properties: File version: 11.00 File size: 59.96 Kb The application was first detected on: 04/05/2014 MD5: 1cc8a91c
