AutoCAD is the most widely used CAD program. It competes with Pro/ENGINEER, Inventor, Creo, and Solidworks. It was named the best commercial software product of 2002, and in 2006, Autodesk acquired the company to gain a lock on their market. According to a study by WebTrends, AutoCAD's market share in 2007 was 42.6 percent, but then declined in 2008 due to the global economic crisis. AutoCAD is designed to be used by architects, civil engineers, mechanical engineers, and a variety of other professions and individuals.
