Q: Populate VB.NET ComboBox from another VB.NET combobox

I have ComboBoxes in VB.NET and I want to add items from the other ComboBox without knowing the index of those items because I want to populate the other

---

ComboBox at run time, depending on the index of the first ComboBox A: In order to add elements to a ComboBox based on the values selected in another ComboBox you will need a backing field of the second ComboBox to act as a lookup to the first ComboBox. Something like this:

```
Public Class Form1
Private FirstComboBoxLookup As
String = "" Private
SecondComboBoxLookup As
String = "" Private Sub
Form1_Load(ByVal sender As
Object, ByVal e As
System.EventArgs) Handles
MyBase.Load
FirstComboBoxLookup =
"combobox1" SecondCombo
```

## **Features Key:**

Classic fantasy RPG with a depth that only RPGs can provide;  
Realistic portrayal of medieval society, courtesy of contributions of Vania Zalizniak -- a production design artist providing the setting of the game;  
Climax-type battles with the unique Synergistic Chain Ability and new tactics as a way to challenge your skills as you progress through the game;  
Story that stretches across a wide game world, with large dungeons filled with intricate three-dimensional designs; and  
World that changes and develops from start to finish, which gives you great satisfaction from aiding its development.

The Elden Ring is due out on PlayStation 4 on December 7, 2016 in Japan for 7,280 yen (including tax).

### What's new in Elden Ring:

**“Tarnished” (Ignis Mundus: Tarnish) is an action RPG written for mobile devices and consoles that plunges you into the lands between worlds, where the mythical lands and monsters in the game coexist. The lands between the real world and the mythological lands are forbidden areas, and players can freely work together in a closed network that allows communication only between player-controlled characters. In Tarnished, games are finished when the last life of a player-controlled character is left to choose from.**
