My game career began in 1987, when I graduated from the College of Animation and Multimedia at the National Chernovtsy Film Academy. In 1990, I set out on my own professional path and joined the Production Division of the Chernovtsy State Computer-Graphics Factory. There I worked as a product designer, designer of graphic trailers and multimedia advertisements. In 1992-93, I was on the staff of a musical-children's TV channel, and later - the first deputy head of

Orc Raid

In Cry of War, you play the role of an elite mercenary unit, trying to complete contracts at an average rate while leveling your units to new heights. Gameplay: Choose from one of six factions: Mercenaries, Imperials, Raiders, Samurai, Knights, or Pirates. Level up your units, acquire new weaponry and fortifications, and command your unit for battles. Every battle in Cry of War impacts your standing in the faction-rank system, and units gain experience depending on the fights they win. Create your own mercenary unit from a selection of different units, assigning them their own level, weapons and equipment. With special unit combinations and tactical abilities, you can use your units in different ways to score points in each battle, buying boosts, items, and other supplies as you level up. Level up your units: Each time you level up, you earn points. As your units get higher levels, they gain more experience, which in turn increases their abilities. Every level is linked to a

certain ability. **Unit Management:** You are able to build a group of units to use in battles. Each faction has different units. While choosing a battle, you can select units from your unit group, you can also select units from other faction if they have the same level as yours. **Battle plan:** Before you deploy a unit into a battle, you can plan the battle with a number of different tactical moves that are available, including summoning supplies and other units. Play the game of "supply management" to gain control of the battlefield. **Gameplay at Gliffy Development** Cry of War is being developed in French by Feral Interactive. **References**

PLAYER 1: Thanks for playing (laughs). If you like the game, you can vote it up and if you don't, you can vote it down. **PLAYER 2:** I'll play the story and leave the review after I finish. **PLAYER 3:** Let's start the review. **PLAYER 4:** Let's go for it. **PLAYER 1:** Let's go for it. Let's start the review. **PLAYER 3:** Let's review the review. The game has a very interesting story, though there were many wrong things. **PLAYER 4:** The story itself is not that bad. The characters are a bit too childish though. **PLAYER 2:** The game is certainly cute, but it's better to just skip it and enjoy the following new story. **PLAYER 1:** I thought that I should probably mention the previous game. **PLAYER 2:** Even though you mention it, I think it's ok to leave it aside. **PLAYER 3:** It's not that big of a deal. **PLAYER 4:** What's up with the settings? I'm a bit confused. Is this on the GBA or something? **PLAYER 1:** I want to remind you of the next scene. **PLAYER 2:** I thought that this was a VR game. **PLAYER 3:** But they are definitely not moving with the two players. **PLAYER 4:** This is definitely a VR game. **PLAYER 2:** But there are still buttons at the bottom of the screen. **PLAYER 1:** They still need to see something. **PLAYER 3:** I thought that it should be a VR game. **PLAYER 4:** You're not the creator of this, but it's fun anyway.

PLAYER 2: It should be a VR game, but the quality is too bad.
PLAYER 1: It's a VR game. **PLAYER 2:** Why are there no buttons?
PLAYER 1: Because this is a VR game. **PLAYER 2:** So I'm only allowed to watch, not to participate?
PLAYER 1: I have no idea. **PLAYER 2:** Even though you mention it, I didn't feel bad, so I'll give it a 2/10. **PLAYER 1:** You can remove your review because I already mentioned it.
PLAYER 3: Is it a VR game? **PLAYER 1:** In reality, the game was like this. **PLAY**

What's new in Orc Raid:

of the Week: I Love You Man by Singer-Songwriter Santi (10/04) Seems I look at the Life Music blog much more now that I've started writing for it on weekdays [and counting down the days until I'm at my computer again on weekends...]. Or maybe, more the fact that a friend on the other side of the country suggested that I do it. Well, thanks for the tip, Vennie! Or maybe it just comes up because I'm still on a coffee high mode. I look at what is going on in the composer field in London and happy to see that it's not only gaining momentum - it's really starting to blossom from all accounts! What with BAFTA accomplishing some amazing projects I still need to go and see the list of winners to create a definite tally in the field of music/sound category. Just wanted to share the great soundtrack of the week - for anyone who like musical inspiration or simply want to improve your taste in music. I Love You Man is a young and beautiful story about a Russian immigrant - young writer Santi-Mariya learning to live in the United States. It tells about his first day on the farm and as he meets different people with different passions for life. He's a music lover and has played the guitar all his life. He's hungry for learning, education and happiness in life: [Verse 1] Hey hey hey hey hey Hey ya hao ya hao ya hao I'm gonna make it Hey you

can do what you want to You got the rest of
your life Hey ya uh ya uh uh uh I don't know
what my life is about Hey hey hey hey hey Hey
ya hao ya hao ya hao I'm gonna make it Just
because Hey mama mama mama I'm gonna
make it baby [Bridge 1] Oh my love my my my
love Oh my love my love my love They keep me
thumping down Oh my love my love Oh! [Verse
2] Hey hey hey hey hey Hey ya hao ya hao ya
hao I don't need to get

We live in a dark time. The humans have
united, a union from strength to strength.
They've seen the worst of the world and its
horrors. Now they will find out, who their true
enemy is. What started as a plan to create
peace, turned into a nightmare of attacks,
death and darkness. Who shall live, who shall
die? Our arrival is the last hope for our species,
a hope to change the course of destiny.
Prepare yourselves, for the end of man, is
about to begin. Story wise, this is a Sandbox-
RPG and it features an interactive tale where
the player controls and choices matter. Story
driven and not experience based, Every quest
contains more than one ending and you, the
player, are free to solve this in any way you
want. This game contains adult content and
strong language. © 2010 Mark Brooks and

always believed in me. For more information on
the origins of this project, please visit: If you
are a fan of Sandbox-RPG, first-person-shooter
and horror games, then you are in for a treat,
because this game is as much about the story-
telling as it is about the gameplay and, in a few

words, this is the best game you've ever played. I've played it right through three times and I still can't seem to stop playing it. I spend hours trying to get 100% -something- on every levels, because the content is incredibly high and I can't even imagine how many hours the real story will take. You start in a world that has been devastated by war and you are given some tools to explore this world. In the beginning you'll only be able to see the world through a small hole, but after the first hours you will be able to see more and more of what you're driving through. If you're tired of blasting cars and trucks, try smashing into them and you'll see something even more surprising than the hit-cars cutscenes were! Anyways, the world you start in is heavily destroyed, but you know it will change soon. You'll be given your first gun, and a quest to kill the godliest being of all: The Evil Piñata

Reversing and Cracking Game Knights and Castles:

A: As you can see, the page is using javascript to generate the second frame. This means that it is a slight security breach, allowing you to see the source code of the page. What you want to do is disable javascript and then resize the window in proportion to change the size of the text on the

page. You could do it manually, but that would be confusing for end users, so I've written a small program on GitHub that does the job. The one problem with this is you'll have to resize in every browser. I'm not sure if you want to re-invent the wheel or not.
