Box a bit more and more these days but he still puts out good basic sounds that are filled with value. Update: Thanks for the tip on the clip name. I did find it in his site but I figured the guy would want more money for the license. I just wish I could have a music keygen for his stuff. It's a decent intro sound and definitely worth checking out. If you want something quick and dirty there is a free version in the top post of the thread. Updated: I guess the clip name is "saturnal trip" Either way my original post below is still correct but with the newest version. Original: Who's about to beat me to it though, we've done it before. If you look in the thread above, you can also find the newest version of the sound by clicking download and selecting what you need. If it were me, I would change my name to jack\_silvie. I like to be original like that. Got to wait for the electricity and my digital camera. I'm thinking of uploading some of the older projects I've done in the early part of the 2000s, I have a couple of blogs listed for original programming. Good times...
