However, could we also allow visitors to an expansion to have access to it - once unlocked, and with a reward. If so, would it make any sense to introduce additional "building slots" during the first expansion, to emulate the construction of a large granary. The reason I ask is simply the need to store field produce and grains before their harvest and the need

to store grain and oil in granaries. A "world's first" unlockable granary would be interesting as it would allow for the start of the world's history to be recorded and highlighted. Be it the earliest structure in the game - the historic wooden hut (similar to the agri space for Stone Age) or the first recorded granary - the starting point of the player's travels. Out of Ammo is a short intensive tactics/strategy game. It is built around the mechanics of room scale VR and the positional tracking of the HTC Vive controllers. You will direct your team of six unique fighters (who are controlled by your fingers, not triggers) to eliminate hundreds of enemy units by strategically placing and placing them in the best position. The use of weapon abilities and buffs depend on where you position your soldiers, as well as their relative distances, directions and heights. Rendering Out of Ammo in VR: A key part of how Out of Ammo is rendered is with the use of an infinite and fast rendering solution to handle the large amounts of data and update rates of room scale VR. Immediate Rendering (Minimal CPU Load): Relatively lightweight, Out of Ammo uses a technique that creates a projection renderer. This technique is best suited to create and render realtime 3D scenes of a very large size. Vsync is added automatically to stop double frames rendering: To prevent the swapping of content in a VR experience, Out of Ammo uses a technique that automatically adds a vertical sync to the game rendering. Oculus Rift Support: Out of Ammo can be played with 3 of the most common VR Controllers (Passthrough, Touch). Oculus Touch support is experimental and requires that your graphics card be a certain version or newer and that you have version 0.39b of SteamVR driver installed. For optimal performance and a significantly lower CPU load, use one of the following controllers. The Touch Controller Pro Controls- Enduras, Sphere, Dual Fingers, Touchpad: The Touch Controller (Passive) Controls- Knuckles, Spheres, Dual Fingers, Touchpad: The Vive Controller Controls- Dual Fingers, Touchpad: c9d1549cdd

## **What's new:**

**(2009) "Ooze Redux," an Indie, New Wave-infused, 30-minute-long episode of "Transformers," combines Robotic Technology with Bees, Power Surges and Pillows to create a variety of ever-pervasive ooze. This is an epic film! Unlike previous episodes (most of which focused on the majestic Transformers), "Redux" makes use of a variety of Transformers, transforming beings. Following humanoid Robots in past episodes (leaving aside the misfit Frightraker), "Redux" takes things one step further; not only do we "see" the ethereal Robots interact with each other, we get to become one of them. The film makes use of traditional 2D animation where tangible human faces and environments reside in a 3D world. Ooze film's premise? A Cybertronian soldier with an itchy leg wound has donned a pillow costume to infiltrate a Cobra facility, leading to an ever-expanding ooze-ring, consisting of five Autobots (five o's and one six plus), one of whom is a "Neophyte" is pursuing a Balboa-esque platinum belt The film contains an anamorphic 2:30 runtime and appears to be a Director's and Writer's Cut. The script seems to be different than previous Episode scripts (a look here). The scene where the Air-Deck has become HUGE (and BIONIC) is what really took the cake (at least for me). I have never seen anything like it before, even in the live action Transformers' universe. And, it is really cool! Anyhow, here's the film. It's worth a watch! I know I enjoyed it! You be the judge. Here's a little story of how I first discovered the good ol' "Transformers" cartoon, back in the early 80s. My uncle was a child of the Great Depression, and some kind of relative had cleaned up the house of an old lady (dying) in Colorado. The old lady had lived in the area since she was a little girl, living in a very poor and bleak town. She said she was going to take a walk. After a harrowing walk, she came upon a storage**
