This article will walk you through a basic tutorial on how to use the tutorials found within the Adobe Photoshop, Adobe Photoshop Elements, Adobe Photoshop Lightroom and Adobe Photoshop Illustrator sections. After you are able to apply the text at the end of the tutorial, feel free to experiment with the different types of text tools available within Photoshop. Try typing "Lightroom" within the text tool to see how adding different weights and alignments could change the final outcome. This Photoshop tutorial is a great place to start to get used to the basics of Photoshop, and I also recommend checking out my other tips on how to use Photoshop.

Step 1. Go to File > New to create a new image within Photoshop. Step 2. Name the new file whatever you'd like. Place this image within a folder and save it. Step 3. This will quickly desaturate and blur the image. Step 8. In the right part of the Levels window,

you should see a blue square within the Level's histogram. Click on the square to bring up the Grid view. Step 9. Click on the white box to create a new, middle-gray square. The square should be in the center of the histogram. Step 10. Click on the blue line in the bottom right of the Levels window to remove the middle-gray square. Step 11. In Levels' Window, a new histogram should appear. The bottom right of the new histogram should be the white histogram bar. Click on the white bar to add the blue histogram bar. Step 12. In Levels' Window, find the large white square near the top of the window. Step 13. Drag the square to the left until the image looks blue within the Levels' Window. Step 14. ****Brushes**** : A brush is a rectangular selection which is used for painting and drawing. You start by selecting a brush size (typically a circular or square one) and then you can use the settings in the brush window to control the size and sharpness of the tool's edge. When you're done with a particular brush, you can change its attributes or delete it. Brushes have a setting that allows you to view a zoomed-out copy of the image—just as you might see while painting on a canvas.

****Eraser**** : If you want to erase an area of an image, use the Eraser tool. The Eraser tool is available in the Toolbox. Pick a particular area on your image, activate the tool, and then scrub the area to the left or right. The area that's not covered by an edge of the Eraser is darkened. You can also quickly erase a group of pixels by pressing a CTRL key while you drag, and the total darkened area is the group you've selected. You can also press a Delete key to delete an area of pixels. In that case, though, the pixels aren't simply erased; they're deleted from the image. (If you don't press the Delete key, you can then retrieve the deleted pixels by pressing the Backspace key a number of times. Doing so creates a blank area in the image.)

****Paint Bucket**** : You can also

erase areas of an image with the Paint Bucket tool. This tool is the equivalent of using a small brush. Just select the area that you want to change or delete and then click the tool's bucket. You can control the effect of this tool by adjusting the Opacity setting. * **Paint** : The Paint tool is used to create a selection or fill area with color. To paint, hold down the Shift key and click with the mouse to select a color. You can then use the tools to resize the area you've selected. See the box below for more information on using the Paint tool. You can use the Paint dialog box to create, edit, and save your own Paint presets. * **Pen** : You can use the Pen tool to draw or trace patterns over a visible or transparent area of your image. You can then manipulate the image as you paint. You can create straight lines with the Pen tool. You can also create curved lines that mimic the pen stroke of an artist's ink

A full 92 percent of Americans think that President Trump has either been honest, or who is trustworthy or who has been at least competent in his handling of the presidency. And, in line with political independents, they believe that more than half of each party, in a polarized country, is either wrong or at least misguided in their view of this

president. According to the latest Morning Consult/Politico Presidential Tracking Poll, the president's overall rating among Americans who are registered to vote has hit a record high of 50 percent — up from 42 percent last September. Democrats are still the most likely to think Trump is honest (89 percent), trustworthy (85 percent) or competent (74 percent). But the president now also garners the most favorable rating from Republicans (49 percent), up from 42 percent last September. And, while he still remains unpopular, at 38 percent, with self-identified independents, he has gained 21 points in popularity among them. Pew Research Center's most recent survey of the public's view of Trump's first year as president found that the president was seen "as the most dishonest" in a list of 36 people, including four other U.S. presidents and three congressmen. His approval rating was at a record low — but only 35 percent — whereas his disapproval rating was a record high at 65 percent. "Americans' assessment of the current president has become more negative as his approval rating has dropped in every single poll since November, with more now disapproving of him than approving of him," American University's Aaron Blake wrote on the Huffington Post. "It's as if his presidency upended the traditional relationship of a president and public opinion." It's been clear since the November

election that Trump had never faced an opposition party as unified and negative toward him as Democrats were during the campaign. Democrats' animosity toward the president now stands at an all-time high. More striking, however, is the blowback from Republicans. "The GOP is united in their dismissal of Trump — a majority, in fact, don't believe he deserves to be president," Blake wrote. "The Republican base is even less supportive, with just 35 percent approving of his job performance, according to Gallup." Trump has also seen a significant drop in favorability among African-Americans and
