A: You're probably looking for this regular expression:
`\b1-\d{2}-\d{4}\s\d{3}-\d{4}\s\d{4}\b` Explanation of the
pattern: `\b` # start word boundary `1` # 1 - # a hyphen `\d{2}`
2 digits - # a hyphen `\d{4}` # 4 digits `\s` # a white space
`\d{3}` # 3 digits - # a hyphen `\d{4}` # 4 digits `\s` # a white
space `\d{4}` # 4 digits `\b` # end word boundary Notes: `\d`
matches a digit, so `\d{3}` will match exactly 3 digits `\s`

matches any white space character, and `\s\s` matches 2 spaces Demo on regex101 Addendum: You can also use the `\b0-\d{2}-\d{4}\s\d{3}-\d{4}\s\d{4}` regex without the need for specifying another word boundary (`\b`). The reaction between thiols and atmospheric sulfur dioxide: model studies and implications for detoxification of dimethylmercury. Attention has recently been directed towards the possible role of the atmospheric sulfur dioxide in the formation of dimethylmercury (DMHg) from methylmercury (MeHg) and H₂O. Since sulfur dioxide (SO₂) is an important compound of atmospheric aerosols, the reaction between the two may take place both in the gas and in the aqueous phases of the aerosol. In this paper we have investigated, through computer simulations, the reaction between SO₂ and thiols (RSH) in the gas and in the aqueous solution phases of aerosols, to evaluate the role played by the aerosols in promoting the formation of DMHg from MeHg. The findings are: (i) for the gas phase the rate constants depend on 6d1f23a050
