## UpDown8 V1.5 - Windows 8 UpgradeDowngrade Helper!

July 20, 2014 - 1) Does UpDown8 keep my system "pristine" except for downgrading Windows? (whether all programs will work, the data will remain.) 2) can I use .NET to write applications that will compile for Windows while they run on Linux? (If not, what are the pros and cons of this?) 3) Is there another way to do this? (For example, how do I get an .exe that will run on Linux and run the .exe on Windows without running all the required 3rd party programs like .NET)? 4) Can I just use C# for Windows development to make it work on Linux? (If so, what are the pros and cons of this?)
