never heard of KUMAR for fluid mechanics, if you really want to dive into the depths of fluid mechanics, then you should choose or buy "CENGEL" in which the concepts are good. For those who are looking for the best fluids for fluid mechanics, we recommend not to use any of these three products because they are cheap Chinese knockoffs. For this reason, when it comes to fluid for fluid mechanics, I recommend to choose KUMAR fluid and I also advise you to buy CENGEL fluid, but don't think that you can buy them anyway. We have KUMAR fluid in our workshop too and we chose it because it has the best properties.
