## Fallout 4 Split Screen Mod

both of these laptops are spec-bumped versions of the model 3 legion y and model 3 legion y. no surprise on the model 3 legion y, but you'll find the screen bumps to the 17-inch legion y from the 15-inch model 3 legion. oh, one other thing: the docking station accessory is out of stock at the time of writing, but we'll add it as soon as we see it in stock. again, not a surprise considering the legion y's price: it's nearly \$500. you can also pick up the model 3 legion y and legion 15 both in red, though we're guessing to match the display. a new line-up, especially at this price, leads to some winners, such as the acer predator helios 300 (`\$649.99) and the newegg-advertised thinkpad x1 carbon (`\$1,199.99). the legion 15-inch and the model 3 legion y have already been reviewed, but we thought it was still worth highlighting the former, which just received a minor power boost with the "nova" series of nforce 750m chips, the ones found in the 460, 470 and 500 notebooks. the improvements are largely in wireless and usb 3.1 gen 2, whereas the performance is similar to the previous generations. but given the price, we still recommend the model 3 legion, if only because the screen size, value and rock-solid build. no matter the legion series or the y model, the cpu and gpu have been upgraded in each to the latest intel kabylake-y generation. we're still feeling the sting, having waited for the new models to go on sale for months. lenovo's devices are usually exceptional value, with its low prices often in the \$800-and-under range. perhaps most confounding is the fact that lenovo has shifted many gaming-friendly features to the touchscreen, meaning they have little real-world use. we've received a few key criticisms, which we don't refute.

## Fallout 4 Split Screen Mod

This is a potential conflict, where a record in the game (Jonah's record of the Experimentation) is split into two records in xEdit. It's not displayed in the Navigation Tree, only the detailed contents of the record are displayed in the Right-hand View Tab. The Ignore menu allows you to choose which of the records from the conflict you want to keep, the hide option ( H ) on that menu is not relevant in this case.

You'll note that the Commander Shepard record in the screenshot below, has its value modified to now have a 0 for its Hit-rating (noted by the blackened-out cells). In this case Blue Sky were successful in modifying the Shepard record to remove the hit-rating from Shepard. If Shepard didn't have that value, that is, if Shepard had a non-zero hit rating, that value would still be retained, as Blue Sky were successful in modifying the record to not modify that value. Both of these records remain in place, but their values have been modified. In the screenshot below, Fallout4Edit detected a conflict and displaying the row in conflict in the Navigation Tree. This shows the conflicts in the Screen View Tab, which includes only the versions of the selected records from the modules that contain them. As in the previous example, the right-most column is the module that loads last, which becomes the version of the record that Fallout4 loads into the game. The conflict in question, is not represented in the Screen View Tab, but it is referenced by its mod-ID, which is indicated in the Navigation Tree. The Ignore menu allows you to choose which of the records from the conflict you want to keep, the hide option ( H ) on that menu is not relevant in this case. 5ec8ef588b
