**Johan De Meij T Bone Concerto Pdf 61 WORK**

# [Download](#)

the first movement, rare, is an allegro moderato in f minor. it has a festive theme and is based on rhythms from the era of g.f. handel. the second movement, medium, is a tempo poco mosso, a slow movement in f major. this movement is based on a motif played by the first trombone. the third movement, well done, is an allegro assai in c major. it has a more serious theme and is based on five motifs played by the first trombone. the orchestration is unusually

---

complex, but the result is extremely well balanced. the t-bone concerto has its centre of gravity in the last movement. the solo part is written for the first trombone, and is played in tierce, evens and double-tongues, using both the left and the right hand. it begins in f major, and after a short introduction, the solo trombone enters in the dominant key of c. there is a slow introduction of the second trombone, and then the third trombone enters in f minor. the first trombone and the third trombone play only a short duet, but the second trombone and the second trumpet play a long duet. the solo trombone and trumpet play an exchange which is concluded by the first trombone. the last two parts of the movement are played by the whole band, and the solo trombone enters again. the trombones play a fast unison part, before the solo trombone comes in. the orchestra plays the same tune again, and the solo trombone repeats the opening notes of the first trombone. after a short interlude, the first trombone begins the

---

opening motive of the movement. after a second interlude, the movement ends in a coda. the whole work is written in binary form, and is one of the most challenging pieces for the solo trombone.

## **Johan De Meij T Bone Concerto Pdf 61**

the performance of this concerto is a milestone in trombone history. de meij showed the world that the slide trombone is not just a novelty instrument. the music is a mix of modern and baroque style. the soloist did not play the horn as a solo instrument, but as a member of an ensemble. the music is a blend of the two styles, and the result is a breathtaking piece. de meij's playing is full of emotion and pathos and is truly amazing. this is the epitome of all that is great about the slide trombone. the johan de meij t-bone concerto is a must for any trombone player. this is the only solo trombone concerto written in the 20th century that is currently being performed. i highly recommend this masterpiece to any trombone player or student of the trombone. reviewers have pointed out that, with the notation, the work can be played in any order. here is a great example. i think the order

---

shown is fine, especially if you play it live as well. this is the first movement, the warm-up before the all-out finale. i really like the way that de meij created this opening movement, which is one of my favorites. the solo trombone part is really compelling and i love how the low brass sounds. the second movement is a lyrical romantic piece with a soft romantic lilt, a solo clarinet part with plenty of expression, and the basses have a beautifully mournful and expressive sound. finally, the finale is a great piece with a fast-paced introduction, a nice march theme, a solo euphonium part with a solid tone, and a fun, jazzy brass section. this is the finale! go!
