KEYMACRO is the perfect choice for PC and Mac users. It is a simple and easy to use automatic license plate data capture software. With KeyMACRO, you can:

- Capture plates of over 20 million vehicles
- Use the microphone to create a sound file to detect car plates
- Test a plate
- Make permanent records of all the plates
- Export a copy of all captured data as text or CSV files
- Download a log of all plate records

KeyMACRO supports a number of drivers and car plates databases, including all provinces and all plates of the USA, Canada and Mexico. You can import all these databases into the software. In addition, you can import your own plate database. You can export all capture and identify data as CSV files.

Location Tracker is a mobile software that works like a GPS system, which tracks the user's current location, the time and direction in which he/she is moving. The application also stores these information on a server for later analysis. You can even call your friends and family, and share your location information with them. This is a free application, though not ad supported.

To build upon the world's best web browser, the Internet Explorer team is proud to introduce the newest version of Internet Explorer for Windows Phone 8. This brings to you a new and intuitive user experience, more ways to make and share web content, and more ways to help protect your information.
