Elemental Design, the digital design platform powered at Adobe by Adobe, today announced the launch of the **Command Line** which makes web-based interaction with Photoshop faster and easier than ever. It offers a way for software developers to build advanced browser-based tools that leverage their scripting language of choice, while still maintaining control over the code that powers their website. The most high-end desktop program today is Photoshop. With top-of-the-line creative enhancements, professional-level plug-ins, and a thriving online community, the flagship program from Adobe is the most complete and the most powerful digital photo-editing platform. **Adobe Photoshop** and **Adobe Photoshop Elements** are more than just regular photo-processing software; they are the industry standard in all categories, from film-to-print and in the Web's digital realm. Adobe has a powerhouse line of editing tools and advanced features for serious photographers and graphics pros as well as novice family and home photographers. The Adobe Creative Cloud 2019 was launched last year with a new unified cloud subscription service and massive updates to the 2023 version of Photoshop and other apps. Photoshop continues to remain the most popular photo-editing product in the world, the Editors' Choice for 18 records in our annual program tests. Other apps in the Adobe Creative Cloud family join Photoshop in the range of top-tier photo editors. Studio products like After Effects and the Adobe Media Encoder bring the power of professional 3D and VR editing to a wide range of creative professionals. Adobe Audition, Adobe Premiere Pro, and the Design Suite includes software for video and audio production. The most important piece of the editing puzzle is Photoshop itself. It has grown from a basic photo editing app that blurred the line between photo manipulation and film-to-print design into a full-blown digital-filmmaking powerhouse. It's the swiss army knife of editorial design and one of the top tools in other creative disciplines, like web design, graphics design, and animation.
