

Official ZTE Axon (A2016) Stock Rom !FULL!

[Download](#)

Official ZTE Axon (A2016) Firmware zte z798bl custom rom A: The easiest and best way to flash firmware is from Stock ROM Repo. However flashing firmware from official ROM repo is not an easy task. So, I have created a Script to help you flashing the firmware from the stock ROM repo. Download Firmware Open script and choose your device, these scripts are specific to each device, you can find the device names of your device. Download the firmware Download the firmware zip file from the link above the image. Extract firmware zip Open extract_firmware.bat and choose your device, these scripts are specific to each device, you can find the device names of your device. Extract firmware zip After the extraction the script will create a folder on the desktop. In the folder choose the platform and device firmware. Create a folder and extract the firmware zip Select the firmware you want to flash and add the firmware zip file. Choose the firmware that you want to flash Copy the output from console and paste in to the flashing script. Make sure the firmware zip has extracted in the right folder. Flash the firmware Choose the firmware that you want to flash. Select Firmware The script will detect the platform and device and after that will ask you to choose the firmware. Choose the firmware you want to flash The script will detect the ROM and after that will ask you to choose the filename. Choose the filename to flash The script will flash the firmware. The script has successfully finished. The Flash script can be run again to flash the new firmware. Instructions to flash the Script Make sure the script is in the correct folder, i.e. in scripts folder. Execute the script file by right clicking it and click on run as administrator. The script will detect the platform and device and will ask you to choose the firmware. Choose the firmware that you want to flash. The script will flash the firmware. The script has successfully finished. Steps to flashing the stock firmware. As a final note, flashing firmware is simple. But you must not try to flash it on wrong devices or where it will harm your device, it is not guaranteed that you won't brick your device
