## Sidify Apple Music Converter

Sidify Apple Music Converter is a useful application that enables you to remove the DRM protection from Apple Music songs, in order to enjoy them offline, at any time, as well as convert local files to various other formats. Easy-to-use iTunes audio converter

First and foremost, you should, of course, ensure iTunes is installed on your computer, as Sidify Apple Music Converter can only import songs from

your library when the Apple service is running. The added files can be sorted by name, artist, album or duration, and you can also search for specific songs. Convert iTunes music and keep tag information Once the songs have been added to the conversion queue, the application displays the information extracted from their ID3 tags, and this data is also embedded into the output files. Songs can be converted to MP3, M4A or M4B, and you can select one of the available

quality presets, which determine the output file's bit rate. As they are processed, the songs are removed from the queue, but all operations are saved in the log and can be viewed by clicking the History button. Moreover, you can open an output file's folder from this menu or remove its history entry. Sleek, novice-friendly user interface Sidify Apple Music Converter features a modern-looking, intuitive interface that, from a visual standpoint, is quite

impressive. The application is also very easy to use, so much so that even complete novices should be able to convert their music in no time at all. In conclusion, Sidify Apple Music Converter is a powerful and user-friendly application that can come in very handy whenever you need to convert iTunes songs to other formats. Sidify Apple Music Converter Description: Sidify Apple Music Converter is a useful application that enables you to remove the DRM protection

from Apple Music songs, in order to enjoy them offline, at any time, as well as convert local files to various other formats. Easy-to-use iTunes audio converter First and foremost, you should, of course, ensure iTunes is installed on your computer, as Sidify Apple Music Converter can only import songs from your library when the Apple service is running.
