Thailand Category: SoftwareQ: How to output verbose log information in sh for example from nodejs app in a shell? I need to print all command execution status output, such as command that is working or not, output from one process (nodejs app) and so on. This is nodejs app with npm installed, so I would need to print the standard output in sh: npm install -g sh Is there a way to do it, as I can do it from Ubuntu console like this: \$ node app.js node: installed at /usr/local/lib/node node: binary at /usr/local/lib/node/bin/node node: node program at /usr/local/lib/node/bin/node node: C++ binary at /usr/local/lib/node/.node-gyp/6.3.0/bin/node Command to print all output: \$ node --version v6.3.0 \$ node --help Usage: node [OPTIONS] [ARGS] -h, --help display this help message and exit -V, --version output the version number -p, --print print the version to standard output -P, --pretty pretty-print the version on standard output -s, --silent do not output the startup info message --stop processing -v, --version output the version number --no-banner suppress banner at startup --no-builtins suppress builtin commands --no-daemon suppress daemon --no-doc do not run doc/api/index.html --no-inspect suppress inspect module --no-optional-module
