Frequently, in the operation of a vehicle, such as an automobile, the driver of the vehicle is required to select an address that will be passed to a navigation system of the vehicle. As a result, the driver is not presented with immediate information that can assist in the operation of the vehicle, thereby potentially leading to a traffic accident. It is therefore desirable to provide a method and system for providing a user interface for a vehicle, such as an automobile, where the user interface is configured to easily select map information related to the vehicle.
